

Gazebo Assembly Picture

- Hello, first of all, congratulations for getting a perfect gazebo!
- To save your time in assembly, pls see what we are doing!
- Go!

Open the box, take out all the parts, put the hooks on each beams

Join all the beams together,

There are 8 beams, four are with connection parts

Assemble the plate to the posts, fix all the 4 plates on the posts

Connect the post and beam together, you get two like the picture on the right side.

Make the two posts with beam go straight, and then connect with other two beams

Assemble all the supporting bars, total 12 supporting bars, then you get the frame as below.

Assemble the corner caps, total 4 caps

Connect 4 ribs on the bottom cap, and put it to the top.

Fix each rib on the beams

fix the two central ribs

Fix the 4 corner ribs

Assemble the top cap

Insert the PC boards to the top frame

Perfect?

Look, what is this guy doing?

He is connecting the top PC board and the bottom board together before insert to the top frame. Please note that this way is more easy to assemble the the corner pc boards.

Now, finished the PC
Next step is to fix the
fence.

Curtains and mosquito curtains
